

**REMARKS**

The present application was allowed on January 5, 2006. Applicants take this opportunity to submit comments on the Examiner's Statement of Reasons for Allowance. In particular, Applicants wish to clarify two points.

First, at page 2, line 17 of the Notice of Allowability, the Examiner indicates that an "aspect of the invention is drawn to a composition in which 50-200 pw of C<sub>2</sub>/α-olefin copolymer synthesized in the presence . . .". However, in fact, the range referred to by the Examiner should read "50-250 pw." In particular, the Examiner is requested to refer to claim 5 of the present invention which correctly recites this range.

Second, at page 2, lines 9, 18 and 21 of the Notice of Allowability, the Examiner has referred to the utilization of a "single site metallocene catalyst." Although a metallocene catalyst is a typical example of a single site catalyst that may be used in the present invention, the allowed claims are not so limited. That is, the claims simply require a single site catalyst.

Accordingly, Applicants hereby request that the Examiner clarify the Reasons for Allowance based upon the above two comments.

If the Examiner has any questions or comments, please contact Craig A. McRobbie, Registration No 42,874 at the offices of Birch, Stewart, Kolasch & Birch, LLP.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to our Deposit Account No. 02-2448 for any additional fees required under 37 C.F.R. § 1.16 or under § 1.17; particularly, extension of time fees.

Dated: April 4, 2006

Respectfully submitted,

By
